

introNetworks Learning Communities

Knowledge Networking Is An Integral Part of Your Learning Strategy

By intelligently matching people to others that they need most, an introNetworks smart knowledge network helps maximize their development – ensuring they can connect to the individuals, teams, training content, or other resources that will make a difference for them. Our smart knowledge networking technology creates a platform for online connections and conversations to occur around the topics of your learning strategy.

With its powerful visual matching technology, an introNetworks system ensures that people connect to what they need most, curators of training content deliver exactly what will most benefit their audiences, managers keep up with their teams, and leaders identify mentors and those who need mentoring.

An introNetworks solution can also seamlessly integrate as one component of or serve as the primary coordination point to complement your online learning strategy. Content of varying types can be represented as “pins”. Forums can be used by facilitators to create online discussions, Resources can provide additional content such as course structures, and User Profiles can track progress and completion.

An introNetworks' smart knowledge network helps your organization reach its full learning potential - delivering breakthrough results for employees, members, management, and learning and development teams.

A unique learning community solution for online and blended learning environments.

Promote learning communities where learners can identify peers by criteria and connect with them directly within the system.

Improve Teamwork with at-your-fingertips communication and Community discussion boards.

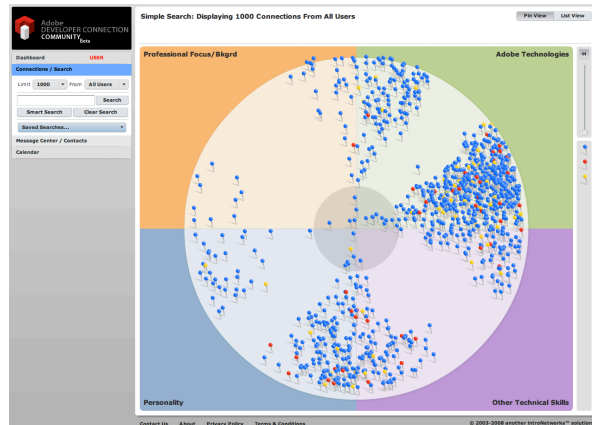

Develop Mentoring easily and organically by allowing people to find their best match.

Facilitator diagnostic tools give you access to an unparalleled depth of information where you can visualize learner performance and/or feedback at a glance.

"We partnered with introNetworks to leverage the power of knowledge networking inside our own company and deliver a more globally connected organization. Over a thousand employees signed on in the first three weeks, expressing gratitude for such a human connection."

- Pam Daniels, Vice President and Global Director, SMG

The introCard™ shows exactly how you match up with a person, resource, or learning content, showing instantly what you have in common.

introNetworks Learning Communities

Since 2003, introNetworks has been the leader in smart knowledge networking technology, providing rich tools for Corporations, Brand Communities, Associations, User Groups and other specialized communities of interest. Corporations using introNetworks in-house include: Adobe, Hewlett-Packard, McCann WorldGroup, NASA, Autodesk, Xerox, and many other early adopters and industry innovators.

The heart of an introNetworks system is the breakthrough proprietary Visual Matching Engine™ which sifts through huge amounts of data and instantly matches people to people and site-specific content. This allows users to quickly identify the people, information or materials that best suit their objectives.

Each introNetwork system has a unique look and feel that is custom configured to meet your needs and organizational objectives. These branded solutions are highly interactive Web 2.0 applications that are built on next-generation Adobe® technology and require only a browser to operate.

Key introNetworks Benefits:

Pinpoint Connections

Knowledge networking technology finds and displays employee matches based on four configurable match points such as values, interests, skills and experience.

- Interactive display allows users to visualize the matching results.
- User profile display provides ranked match points and one-click access for more detailed information.

Share Information

- File and media sharing technology provides easy, on-demand access to company services and information.
- Image display enhances profile view.
- Video creation and playback bring life to user profiles.

Manage Effectively

- Internal candidates can quickly be pinpointed for teaching, mentors, or study partners.
- Clear, concise reports increase access to real-time trend data.

Brand/Personalize Your Solutions

- Branded solutions are custom-made to fit your company.
- Agile technology integrates with your existing employee database.
- Friendly interface blends seamlessly into your existing online intranet.

Organize Your Communication

- Communication tools provide for effective introductions and meeting requests.
- Scheduling tools allow meeting organization.

Analyze Your Workforce

- Reporting system aids in identifying employee learning related trends.
- Demographic, sociographic and psychographic data enable detailed analysis.
- Mission critical data delivered on a timely basis enables quick response.
- Various report output methods allow for familiar and clear results.

Reach Target Audiences

- "House ads" or announcement delivery mediums provide flexibility for many types of information campaigns.
- The IntroMail™ solution announces new services or content matches to employees through personalized messaging.
- User profiling allows for the creation of accurately targeted teambuilding lists.

Experience Rapid Deployment

- Your introNetworks Training Community can be configured and securely integrated into your intranet in less than a week.
